

MEDICATED PRODUCTS

Here at Davis, we often get questions about pet skin problems and what to do about them. As pet lovers, we understand the concern when presented with a client's pet who is uncomfortable or suffering from skin issues. Davis loves providing solutions and hearing back how we helped you improve a pet's quality of life.*

Bathing Tips for Skin Problems

- Use luke-warm water for bathing pets with irritated skin
- Help skin normalize after shampooing with a conditioner
- Rinse thoroughly
- Gently towel dry and steer away from heated dryers
- Avoid the use of coat finishing and styling sprays

Davis recommends our TheraCoat® supplement for all pets and especially those with skin problems. TheraCoat, combined with a healthy diet, can help eliminate the majority of skin problems that most pets face. Products from the Davis Therapeutic line chosen for the appropriate issue aids in providing relief until the pet is healthy again.

*Clients should first consult with their veterinarian for diagnosis and treatment
