

Studio Color™

Usage Tips

- ▶ Supplies to have on hand before you begin: plastic gloves, plastic wrap or plastic bags, vet wrap or painter's tape and a dryer.
- ▶ Thoroughly wash and dry pet's hair before applying.
- ▶ Wear gloves. The semi-permanent dye will stain just about any surface it touches.
- ▶ To help prevent the dye from going beyond the area you wish to color, wrap adjacent areas with vet wrap or painter's tape.
- ▶ After Davis Studio Color is applied, cover the colored area with a glove, plastic bag or plastic wrap to keep the dye from running and to promote deeper color.
- ▶ Allow the dye to set for at least 15 minutes. The longer the dye sets, the more vivid the color will be.
- ▶ After the dye is set, rinse the dyed area thoroughly with water until the water runs clear. Skipping this step could cause the dye to run if the pet gets wet, leading to staining any surface the wet pet touches.
- ▶ Dry pet thoroughly before allowing on unprotected furniture, floors, etc.

Usage Advisory

- ▶ This product is a semi-permanent dye that will stain unprotected skin, clothing, tabletops, counters, floors and walls.
- ▶ Wear gloves when using this product.
- ▶ Do not allow color near eyes.
- ▶ Keep out of the reach of children.
- ▶ Follow the instructions on the label and at davismfg.com.
- ▶ Follow state, local and federal laws concerning the use of dyes.

Caution: The user assumes all risks of use and handling this product. This is a professional salon product for use only by licensed groomers. Not for use by pet owners or the general public. MSDS available at davismfg.com.
